SUMMARY

Dedicated React.js developer with hands-on-experience, blending technical proficiency with a collaborative spirit to deliver high-quality solution in a dynamic team environment.

EXPERIENCE

Front-End Developer
Grass Solutions Pvt. ltd   March 2023 - Nov 2023

- Revitalized the company's product website using React.js, implementing modern frontend technologies to enhance features and optimize performance. Collaborated cross-functionally to seamlessly integrate improvements, resulting in an elevated user experience and a polished online presence.
- My expertise will involve crafting efficient, single-page web applications that provide seamless user experiences. Translated design mockups and wireframes into functional and visually appealing web pages using HTML, CSS, and JavaScript.
- Utilized Reactjs component-based architecture to design and implement reusable UI components, enhancing code maintainability and development efficiency
- Ensured cross-browser compatibility and adherence to web standards for consistent functionality across different platforms.
- Collaborated to optimize UX, streamline APIs, and create 70+ reusable components, reducing bundle size.
- Implemented RESTful APIs and integrated with external APIs for data retrieval and manipulation.
- Created interactive UI using One-way data flow, Virtual DOM, JSX and React concepts.

Software Testing Engineer
Magic EdTech,   Dec 2021 - Feb 2023

- Developed comprehensive test plans, test cases, and test scenarios tailored to the unique requirements of educational software, including content management systems, e-learning platforms, and mobile applications.
- Conducted comprehensive manual accessibility testing of web and mobile applications to ensure compliance with accessibility standards such as WCAG (Web Content Accessibility Guidelines) 2.1, Section 508, and ARIA (Accessible Rich Internet Applications).
- Developed test plans and testing strategies specifically tailored to assess the accessibility of digital content and applications, ensuring that they met the needs of diverse user groups, including those with visual, auditory, motor, and cognitive impairments.
